# FSM / fsm_256: estimation outcomes

Population: finite. Outcome cells show count (% of all attempted trials).

| N | Method | Trials | Finite | Converged / passed | Stalled | Max iterations | HMC warning | Failed / invalid | Skipped | Used |
|---|---|---|---|---|---|---|---|---|---|---|
| 500 | RGLS | 100 | 0 (0.0%) | 0 (0.0%) | 0 (0.0%) | 0 (0.0%) | 0 (0.0%) | 0 (0.0%) | 100 (100.0%) | 0 (0.0%) |

Finite includes valid optimizer estimates and finite HMC posterior estimates, including sampler warnings. Used is the bias/RMSE population.
Converged / passed means optimizer convergence or HMC diagnostics passed. HMC warnings are separate; failed/invalid is red; skipped is separate.
