PL / recursive_PL: optimization outcomes

Population: finite. Outcome cells show count (% of all attempted trials).

N	Method	Trials	Finite	Converged	Stalled	Max iterations	Failed / invalid	Skipped	Used
500	RGLS	100	100 (100.0%)	64 (64.0%)	0 (0.0%)	36 (36.0%)	0 (0.0%)	0 (0.0%)	100 (100.0%)

Finite includes converged, stalled, and iteration-limited estimates. Used is the population included in bias/RMSE summaries.
Failed includes invalid updates (red); skipped methods are separate. n/a means the saved file lacks that status breakdown.
